The exhibition features paintings, photos, textile collages, sculptures, film and text pieces from 10 artists.

The exhibition aims to show artworks that are exemplary of a new kind of autonomous, daring contemporary artist figure. This artist is bold enough to take on multiple roles – art maker, curator, gallerist – a balancing act where the artist risks his/x/her position vis-a-vis the prevailing contemporary art trends, which emphasises cool detachment, abstraction and distance. This risk is heightened by as the artist that negotiates a fluid and challenging existential condition, which is expressed in the materiality and presentation of their works.

**Dr Thomas Vann Alzheimer** (1972) is a gallerist/curator/filmmaker from Denmark. He has a PhD in Art from Goldsmiths College, London. He taught at CalArts, CA, in 2014 before he moved to Tijuana to pursue a career as a gallerist.
